Canadian Metallurgical Quarterly

Volume 26, No. 1, January–March 1987

CONTENTS

R. Harris, R. J. McClincy and E. F. Riebling	1	Bismuth, arsenic and antimony removal from anode copper via vacuum distillation
S. L. Thompson, D. R. Morris and R. Firlotte	5	Investigation of fluxing in a lead blast furnace
S. Bizabalimana et G. A. Capuano	13	Electrodéposition des alliages aluminium–zinc en milieu organique
Li Ruixing, Zhu Jiqing and P. A. Distin	21	Hydrogen stripping of nickel from a loaded chelating extractant
M. L. Kumar, Kun Li and G. W. Warren	29	Kinetics and modeling of the gas-phase chlorination of chalcopyrite—I. Reactions with powder
P. M. Mathew and P. A. Krueger	37	Casting development for nuclear fuel disposal containers
O. E. Okorafor	47	Some aspects of structure and porosity of full mould cast Al–Cu alloys
K. J. Lakshminarayana Iyer, S. Ramakrishna Iyer and V. M. Radhakrishnan	53	Some aspects of hot corrosion of superni by vanadium
Zhi-min Yin, K. T. Aust, G. C. Weatherly and D. J. Lloyd	61	The deformation and fracture of two Al–Li based alloys
Martin Gagné	71	The combined effect of chromium and manganese on the thermal stability of eutectic and eutectoid cementite in ductile irons

Canadian Metallurgical Quarterly

Volume 26, No. 2, April–June 1987

CONTENTS

S. W. Marcuson and W. T. Thompson	83	Announcement
MINERALS AND MINERAL PROCESSING		
R. Lastra-Quintero, N. Rowlands, S. R. Rao and J. A. Finch	85	Characterization and separation of a copper smelter dust residue
CHEMICAL AND EXTRACTIVE METALLURGY		
J. E. Dutrizac and J. L. Jambor	91	The behaviour of arsenic during jarosite precipitation: arsenic precipitation at 97°C from sulphate or chloride media
J. E. Dutrizac, J. L. Jambor and T. T. Chen	103	The behaviour of arsenic during jarosite precipitation: reactions at 150°C and the mechanism of arsenic precipitation
X. F. Zhang and J. M. Toguri	117	The equilibrium distribution of sulphur between basic slags and steel
T. Stapurewicz and N. J. Themelis	123	Mixing and mass transfer phenomena in bottom-injected gas–liquid reactors
T. Utigard, J. M. Toguri and K. Grjotheim	129	Interfacial tension of the aluminum–cryolite and iron–slag systems
F. Ajersch	137	Chemical and physical characteristics affecting the reduction kinetics of iron oxide pellets with solid carbon
PHYSICAL METALLURGY AND MATERIALS		
W. J. Liu and M. G. Akben	145	Softening behavior of two Ti bearing steels during torsional simulation of rolling
S. Misra, D. P. Dunne and T. Chandra	155	Ferrite formation from deformed austenite in a Ti modified HSLA steel
J. E. M. Braid, D. Taylor and J. F. Knott	161	A model for fatigue thresholds at high *R* ratios

Canadian Metallurgical Quarterly

Volume 26, No. 3, July–September 1987

CONTENTS

MINERALS AND MINERAL PROCESSING

S. R. Rao and J. A. Finch — 167 — Electrochemical studies on the flotation of sulphide minerals with special reference to pyrite–sphalerite—I. Cyclovoltammetry and pulp potential measurements.

S. R. Rao and J. A. Finch — 173 — Electrochemical studies on the flotation of sulphide minerals with special reference to pyrite–sphalerite—II. Flotation studies

CHEMICAL AND EXTRACTIVE METALLURGY

Kai Grjotheim, Feng Nai Xiang, Bjarte Haugsdal and Halvor Kvande — 177 — Current efficiency measurements in laboratory aluminium cells—X. Anodic overvoltage and potential decay curves

Kai Grjotheim, Feng Nai Xiang, Bjarte Haugsdal and Halvor Kvande — 181 — Current efficiency measurements in laboratory aluminium cells—XI. Anode gas composition and anode consumption

Kai Grjotheim, Feng Nai Xiang, Bjarte Haugsdal and Halvor Kvande — 185 — Current efficiency measurements in laboratory aluminium cells—XII. Low-melting bath

J. E. Dutrizac and T. T. Chen — 189 — Mineralogical characterization of leach residues of a pyritic Zn–Pb–Cu–Ag concentrate

M. K. Soleiman and Y. K. Rao — 207 — Kinetics and mechanism of chlorination of alumina grains with He–CO–Cl_2 gas mixtures—I. Experimental

Y. K. Rao and M. K. Soleiman — 217 — Kinetics and mechanism of chlorination of alumina grains with He–CO–Cl_2 gas mixtures—II. Intrinsic rates and effectiveness factors

M. Chanda and G. L. Rempel — 227 — Catalyzed air oxidation of thiosalts

PHYSICAL METALLURGY AND MATERIALS

I. G. Ritchie, Z-L. Pan, K. W. Sprungmann, H. K. Schmidt and R. Dutton — 239 — High damping alloys—the metallurgist's cure for unwanted vibrations

O. Vosikovsky, W. R. Neill, D. A. Carlyle and A. Rivard — 251 — The effect of sea water temperature on corrosion fatigue-crack growth in structural steels

MATERIALS PROPERTIES AND PROCESSING

W. F. Caley, L. E. Kanary and D. B. Clarke — 259 — Chemical and mineralogical examination of a $4Cr_2O_3.MgO$ coating applied to a bloating fireclay brick

Canadian Metallurgical Quarterly

Volume 26, No. 4, October–December 1987

CONTENTS

CHEMICAL AND EXTRACTIVE METALLURGY

J. E. Dutrizac and T. T. Chen	265	A mineralogical study of the phases formed during the $CuSO_4$–H_2SO_4–O_2 leaching of nickel–copper matte
R. S. Celmer, G. H. Kaiura and J. M. Toguri	277	Chemical reactions during the electric smelting of nickel–copper calcines
H. H. Kellogg	285	Thermochemistry of nickel–matte converting
B. R. Conard, G. A. Meyer, L. Timberg, J. S. Warner and P. Hynek	299	Thermodynamic activities of components in homogeneous Ni–Fe–S mattes at 1473–1673 K
Ker-Chang Hsieh and Y. Austin Chang	311	Thermochemical description of the ternary iron–nickel–sulfur system
Suresh K. Gupta and W-K. Lu	329	Effect of additives on the strength, reducibility and swelling of low silica iron ore pellets
Y. H. Kim and N. J. Themelis	341	Rate phenomena in the oxidation of zinc, iron and copper sulfide pellets

MATERIALS PROPERTIES AND PROCESSING

F. Mucciardi	351	Monitoring liquid–gas interactions with an accelerometer
Volume 26 Contents and Author Index	i
